These black and white squares have appeared everywhere from billboards at the side of the road, roof tops, cola cans, buses, magazines, etc. So why not in your library, textbook, assignment, project, or classroom display. The ability to use them to direct students or colleagues to online resources (presentation slides, websites, video, book location, etc. ) is powerful and engaging and, when well implemented, can offer a level of interaction and engagement. It's not about what they are but about how we use them and what they can offer me in an educational setting. Whether you're a teacher, student, parent, school governor, or on the PTA, you ought to know about QR Codes what they are, how they work, and how you can leverage them to increase student participation in and around the classroom. They offer the ability to share digital content from teacher to student, from student to student, and even from student to teacher. Go on, try it! This eBook will explain everything and put QR Codes in context. Using computers and technology in educational environments...
