HUMAN CAPITAL: THE POWER OF KNOWLEDGE (PAPERBACK)

Organization for Economic Co-operation and Development (OECD), France, 2007. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. This first book in the new OECD Insights Series examines the increasing economic and social importance of human capital - our education, skills, competencies, and knowledge. As economies in developed countries shift away from manufacturing, economic success for individuals and national economies is increasingly reliant on the quality of human capital. Raising human capital has emerged as a key policy priority, particularly for low-skilled individuals, who are at risk of being left even further behind. Policy in this area is focusing on early childhood development, improving quality and choice in schooling, creating excellence in tertiary education, and widening access to adult learning. Drawing on the research and analysis of the OECD, this dynamic new book uses straightforward language to explain how countries across the OECD area are responding to the challenge of raising their levels of human capital. This book includes Statlinks, URLs linking statistical tables and graphs in the text of the book to Excel spreadsheets showing the underlying data.
