PHP 5 CMS Framework Development (Paperback)

By Martin Brampton

Packt Publishing Limited, United Kingdom, 2008. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.DETAIL DESCRIPTION If you re developing a content management system in PHP 5, there are times when you simply have to roll-your-own, for whatever reason. In those situations, this book will be invaluable. If you re looking for an inside guide to putting together the working framework of a flexible, robust content management system in PHP 5, this book is for you. As a former development team leader on the renowned Mambo open-source content management system, author Martin Brampton offers unique insight and practical guidance into the problem of building an architecture for a content management system. Following the scene-setting first chapter, each chapter in the book tackles a different aspect of developing the author s new Aliro PHP 5 CMS framework, with: . A concise statement of the problem . Discussion of the important design issues and problems faced . Creation of the framework solution The framework is built on a strongly object-oriented architecture throughout, including adherence to MVC principles, and you will learn how to create classes for handling such things as menus, modules, components, sessions, and user tracking....

Reviews

Complete information! Its this kind of good study. This really is for all those who statte that there was not a well worth looking at. I found out this pdf from my dad and i encouraged this ebook to learn.

-- **Candida Deckow III**

These sorts of pdf is the greatest ebook offered. We have study and that i am sure that i will going to study once more once more in the future. Its been printed in an remarkably simple way and it is only after i finished reading through this pdf through which in fact transformed me, affect the way i believe.
