

## Enhancement of the power quality and power factor in power system

By Jambulingam, Vikramarajan

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Sinusoidal Pulse Width Modulation controlled active filter for power quality, power factor improvement in power system | The Sinusoidal Pulse Width Modulation controlled active filter is used for enhancement of the power quality and power factor in three phase power systems. Active power filters are widely used for elimination of non-sinusoidal currents. Active filter is designed to cancel harmonics generated by nonlinear loads using a pulse width modulated rectifier topology. The pulse width modulated control of the active filter allows independent control of lower order harmonics for improvement of the power quality and power factor. The active PWM rectifier acts directly on the main line currents, forcing them to be sinusoidal and in phase with the main voltage supply. | Format: Paperback | Language/Sprache: english | 60 pp.

### Reviews

*This pdf is amazing. I actually have read and i also am sure that i am going to planning to read once more yet again in the foreseeable future. Your lifestyle period will probably be convert once you total looking at this publication.*

-- **Ms. Aileen Larkin**

*Here is the finest publication i have read through until now. I am quite late in start reading this one, but better then never. I am just easily can get a pleasure of studying a created publication.*

-- **Morgan Bashirian**
