Createspace Independent Publishing Platform, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This publication, *Countering Air and Missile Threats (Joint Publication 3-01)*, provides doctrine for joint counterair operations and protection against air and missile threats across the range of military operations. Counterair integrates offensive and defensive operations to attain and maintain a desired degree of air superiority and protection by neutralizing or destroying enemy aircraft and missiles, both before and after launch. Integrated air and missile defense (IAMD) is an evolving approach that uses the counterair framework at the theater level. IAMD emphasizes the integration of offensive counterair (OCA) attack operations, defensive counterair (DCA) operations, and other capabilities as required to create the joint force commander s (JFC s) desired effects. The IAMD approach also encompasses global strike and global missile defense beyond the theater level. The counterair mission integrates both offensive and defensive operations, by all capable joint force components, and counters the air and missile threat by attaining and maintaining the degree of air superiority and protection desired by the JFC. Generally, OCA operations seek to dominate enemy airspace and prevent the launch of threats, while DCA operations defeat enemy air and missile threats attempting to penetrate or attack through friendly airspace. Integrating a mixture of capabilities from components bolsters the friendly force potential and likely will frustrate the enemy s ability to defend itself. Synchronization of OCA and DCA operations is vital to avoid duplication of effort and help prevent fratricide. Expanded technology and proliferation of missiles, including cruise missiles (CMs), ballistic missiles (BMs), and air-to-surface missiles (ASMs), expand the scope and complexity of protecting friendly forces and vital interests. The detection capabilities, engagement ranges, mobility, and lethality of surface-to-air missile (SAM) systems and fighter aircraft have significantly...
