

Renal Cell Carcinoma (Paperback)

By -

Oxford University Press Inc, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. While patients with metastatic renal cell carcinoma (mRCC) are now living longer with improved quality of life, the success of novel therapies for mRCC has created challenges for practicing oncologists. Many patients who initially respond to targeted therapies ultimately develop progressive disease due to acquired resistance to these agents. Additionally, some patients do not respond at all to any of the currently approved targeted agents, underscoring the need for continued and concerted efforts to identify other relevant targets and pursue alternative therapeutic strategies. Part of the Oxford American Oncology Library, Renal Cell Carcinoma is a concise handbook that addresses the complex management of patients with mRCC. The book begins with a review of the epidemiology, pathology, and biology of renal cell carcinoma followed by chapters on specific targeted therapies and managing complications. The final chapters discuss supportive and integrative care and emerging therapies.
