## MODELOVANI REALITY (CZECH EDITION)

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 70 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. Modeling is helpful tool when we try to understand some complex issues. It reduces complexity to simple, easy to understand model. In this brochure, the most difficult intricacy, selected for scrutiny, is: The universe and our existence. This brochure addresses the eccentricities of quantum mechanics: quantum superposition and quantum entanglement, and explains why objects exist only if they are observed. The impracticality of time-travel is explained, together with the time dilation, affecting the interplanetary travel. Also explained is the reason for some planets to emit radio waves instead of light. Our model allows for possible existence of parallel universes and definitely excludes evolution theory. The quantum mechanics theory is expanded and the concept of light and its constant speed is explained. Apparent light's ability to pass any moving observer with its constant speed is also demystified. This brochure does not require deeper understanding of physics or mathematics. The only requirement is the willingness to think. This item ships from La Vergne, TN. Paperback.
