Practical Action Publishing, United Kingdom, 2010. Paperback. Condition: New. Language: English . Brand New Book. Over two billion people worldwide are without access to clean, modern energy, which leads to drudgery, ill health and sometimes death. Although a lack of adequate energy affects people s health and well-being, as well as their productive and educational capacities, addressing this deficit is a low priority for governments and donor agencies. The Hidden Energy Crisis outlines why we have failed so far to extend energy access to the world s poor, and suggests operating models that have greater potential to make a difference. It argues that meeting the basic needs of the world s energy poor will not make a significant to global carbon emissions. However, it will take significant effort and finance from international donors, multinational and national governments to scale up successful pilot projects dramatically to make a significant impact on the poor. This book presents a call to action to address the energy crisis. It should be read by policymakers in governments and donor agencies, as well as academics, students and staff of donor agencies.
