Springer-Verlag New York Inc., United States, 2013. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book. This eagerly awaited volume occupies an important place in the series Critical Issues in Psychiatry. Most mental health professionals are quite at home with ordinary day-to-day crises of clinical practice but relatively unprepared for the true psychiatric emergency. Such emergencies are too infrequent for most of us to experience a real sense of competence. On the other hand, emergency room psychiatrists as well as residents and other trainees have long wished for a truly comprehensive textbook that would cover the spectrum of emergency psychiatry. This book is just such a definitive and comprehensive volume for the specialist, while at the same time a clear, succinct, and comprehensive reference for the clinician. of emergency care, The authors consistently present a systematic model emphasizing the interconnection between the process of emergency intervention and the specific features of clinical crisis. They are true to the principle that one s system of care should be built on priorities. It is immediately apparent that these are highly experienced clinicians as well as teachers. It is difficult to imagine a clinical situation that is not addressed by this book. It includes chapters on triage, assessment, and treatment planning; emer- gencies associated with all the various psychopathologies; age groups from childhood to old age; the emergency management of violent and suicidal pa- tients as well as rape and disaster victims; emergencies secondary to substance abuse and prescribed medications; psychotherapeutic and psychopharmacol- ogic intervention; as well as the relevant legal, social, and community issues in emergency care. Softcover reprint of the original 1st ed. 1984.
