INTERACTION OF ELECTROMAGNETIC WAVES AND ELECTRON BEAMS WITH PLASMAS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Theoretical study of nonlinear plasma physics | With the advent of laser and maser, the wave-plasma interaction emerged as a major rich field of research. To explore the possibility of laser driven fusion, laser-plasma interaction became a subject of worldwide research, revealing many novel nonlinear phenomena including generation and saturation of plasma instabilities, electron acceleration, and ion Coulomb explosion. The work presented in this thesis is related to intense laser-plasma and electron...

Reviews

The publication is straightforward in study better to fully grasp. It is definitely simplistic but excitement inside the 50 percent of your publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
