Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916-07 edition. Excerpt: .of some 500,000 square miles, or an archipelago similar to the one lying north of western Canada. Upon the hypothesis of a deep and uninterrupted polar basin it is diiiicult to account for the fact that the range of the semi-daily tide along the north coast of Alaska is only about a quarter as great as that at Bennett Island, near the New Siberian group. Dr. R. A. Harris, of the U. S. Coast and Geodetic Survey, who for years has studied the problems connected with the tides of the Arctic, has, even sketched an hypothetical continent within the unknown area. He has also shown that the diurnal tides along the north coast of Alaska have less than one half the rise and fall which the tidal forces acting over an uninterrupted basin would produce, and that the daily ebb and flow actually occurs...
