Forgotten Books. Paperback. Condition: New. 316 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. We first of all commenced by using short manuscript accounts of the various processes and instruments for the use of our students. This, although satisfactory as far as it went, was found insufficient, and had to be supplemented by references to books not always accessible. Learning from various quarters the desirability of a simple yet systematic treatise on physical instruments, we were at length induced to undertake the task ourselves. It was first proposed to publish the whole in one volume, but as the matter grew under our hands it was suggested to us by Professor Sir Henry Eoscoe that it might be advantageously published in three volumes. This arrangement will, we imagine, be convenient for students who wish to cultivate some particular branch of physical inquiry. The present volume will, we hope, be followed in due course by one on Electricity and Magnetism; and our work will be rendered complete by a third on Heat, Light, and Sound. (Typographical errors above are due to OCR software and dont occur in the book.)
