## Lighthill Report

By Frederic P. Miller

Alphascript Publishing. Taschenbuch. Condition: Neu. Neuware - The Lighthill report is the name commonly used for the paper 'Artificial Intelligence: A General Survey' by Professor Sir James Lighthill, published in Artificial Intelligence: a paper symposium in 1973. lighthill\_report Published in 1973, it was compiled by Lighthill for the British Science Research Council, and evaluated academic research in the field of Artificial Intelligence. The report gave a very pessimistic prognosis for many core aspects of research in this field, stating that 'in no part of the field have discoveries made so far produced the major impact that was then promised'. It 'formed the basis for the decision by the British government to end support for AI research in all but three universities' aima Edinburgh, Sussex and Essex. While the report was supportive of research into the simulation of neurophysiological and psychological processes, it was 'highly critical of basic research in foundational areas such as robotics and language processing'. ai\_at\_edinburgh The report stated that AI researchers had failed to address the issue of combinatorial explosion when solving problems within real world domains. 108 pp. Englisch.
