To read **Bulletin of the Electro-Therapeutical Laboratory of the University of Michigan Volume 1; V. 4** PDF, you should access the button beneath and download the ebook or gain access to other information that are highly relevant to BULLETIN OF THE ELECTRO-THERAPEUTICAL LABORATORY OF THE UNIVERSITY OF MICHIGAN VOLUME 1; V. 4 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: .breaking of the circuit at the spring vibrator, the inductive influence of this current on the temporary magnet ceases, and there is a sudden withdrawal of the magnetic lines of force which came from this source. This sudden loss of potential creates an induced current in the primary coil which has the same direction as the battery current, but as the battery circuit is open between the contact point and the spring, this current can only traverse that circuit by leaping the air-gap, which it does at times and causes the spark which is seen at this point when the instrument is in action. If another circuit is provided for this current that is induced in the primary coil at the break of the battery current, then this induced current at the break can be utilized in therapeutic work. And this is the origin of the current derived from the medical induction coil that goes by the name of primary current. It is a unidirectional current, but interrupted with a frequency corresponding to the movements of the vibrator. It has the same direction as the battery current, but differs from it in having less quantity but higher electro-motive force. Both its strength and electromotive force can be varied by moving the shield covering the core, or by changing the position of the core itself, if this is made movable. The primary induced current has in a feeble way the properties of a direct or galvanic current....
