

## General Theory of Polyconic Projections Volume 57

By U S Coast and Geodetic Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .Twith the same two lines, respectively. With regard to the two circumferences S and T, we should have to point out the same properties that were pointed out as obtaining between the two circumferences S and O. It will be sufficient to indicate the following facts: Since if lies on the parallel circle which is the locus of points with distances from P and P in the ratio DP to DP , the ratio of MP to MP is the same as that of DP to DP ; therefore, the line MD is the bisector of the angle PMP , and it should pass through the mid-point G of the arc PG P ; then the three points M, D, G are in a straight line; the same is true of the three points D , M, G, as also of G, D, M and of...
