Excerpt: . a moment, and intense electric energy was apparent. One observer said, the cloud appeared on fire at the bottom like a large pile of burning brush. Others say it was a cloud with green and red flame, and others said it was green and blue. The following were the impending planetary equinoxes: Venus May 30th; Mercury April 21st, or nine days before the tornado; Vulcan May 1st, or the day after it. The following, though containing nothing extraordinary, will be read with interest since it is the first case wherein our theory is brought to the test of the actual observations of the Signal Service.
