Masters Thesis from the year 2007 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 1. 3, Anglia Ruskin University (Ashcroft International Business School), language: English, abstract: After a series of cardiac implantable device recalls hit the industry in the year 2005 the question of a favourable corporate communication strategy about inevitable product recalls was raised. Knowing that it is impossible to produce 100 failure free products I was personally interested in seeing how such recalls occurred and how successful they were handled by the different companies from a communication perspective. This thesis analyses such device recalls since the year 2000 and attempts to identify a favourable communication strategy for the companies involved in such recalls in the future. Qualitative analysis was performed on various secondary data sources to find positive and negative aspects of different communication strategies for the affected companies. Four companies could be analysed, where three provided significant results, which were used for final recommendations. Those recommendations are provided to support active corporate communication.
