Reviews

Good e-book and beneficial one. I was able to comprehend everything out of this published e pdf. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Mariana Schaden II)

STEEL FIBER REINFORCED CONCRETE

LAP Lambert Academic Publishing Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Concrete is relatively brittle, and its tensile strength is typically only about one tenths of its compressive strength. Regular concrete is therefore normally reinforced with steel reinforcing bars. Their main purpose is to increase the energy absorption capacity and toughness of the material, but it also increase tensile and flexural strength of concrete. Concrete containing a hydraulic cement, water, fine or fine and coarse aggregate and discontinuous discrete fibers is called fiber-reinforced concrete (FRC). In this book, critical investigation for M-20 and M25 grade of concrete to study the compressive strength and tensile strength of Hooked end steel fiber reinforced concrete (SFRC) containing fibers of 0%, 0.5%, 1.0% and 1.5% volume fraction of Hooked end steel fibers of 35mm length and 0.65mm diameter are used. For compression test, the cube and Cylinders are used. For splitting Test, Cylinders are used. The results of tests have been analyzed and compared with a controlled specimen (0% fiber) of concrete. 88 pp. Englisch.
