Introduction 10 are devised by researchers to represent the interests of the field, and with these new quantities come new equations relating them to those quantities that were previously familiar, and hence ultimately to the base quantities. In this way the derived units to be used with the new quantities may always be defined as products of powers of the previously chosen base units. 1. 2 The International System of Units ( SI ) and the corresponding system of quantities The name Systme This Brochure is concerned with presenting the information necessary to define and International dUnits, use the International System of Units, universally known as the SI ( from the French and the abbreviation SI, were established by the Systme International dUnits ). The SI was established by and is defined by the 11th CGPM in 1960. General Conference on Weights and Measures, the CGPM, as described in the Historical note in Section 1. 8 below . The system of quantities, including the equations relating the quantities, to be used Examples of the equations relating quantities used in with the SI, is in fact just the quantities and equations of physics that are familiar to the SI are the Newtonian all scientists, technologists, and engineers. They are listed in many textbooks and in inertial equation relating many references, but any such list can only be a selection of the possible quantities force, F, to mass, m, and acceleration, a, and equations, which is without limit. Many of the quantities, their recommended for a particle:  $F = ma$ ,...
