Springer-Verlag GmbH Sep 2009, 2009. Taschenbuch. Condition: Neu. Neuware - Welcome to the proceedings of the 4th European Conference on Smart Sensing and Context hosted by the Centre for Communication Systems Research, University of Surrey, in Guildford, UK. Smart sensing and context are the key enablers for effective autonomous systems, providing transparent technologies to realize the vision of ubiquitous computing, intelligent services and networking. (Wireless) Sensor and actuator networks, tightly integrated into the structure of the Internet provide the underlying manifestation of the physical world into the Internet of Things. Networked sensors can infer context from raw data and capture user and application needs to provide smart adaptive services. Higher-level context can be deduced locally or remotely by combining and abstracting information from smart sensors. The 4th European Conference on Smart Sensing and Context explored new techniques, algorithms and architectures on utilizing context and context-aware services and their applications. The conference builds on the success of the past editions held in Zurich, Switzerland in 2008, in Kendal, UK in 2007 and in Enschede, The Netherlands in 2006. EuroSSC is a forum to exchange ideas and to discuss the most recent developments in smart sensing and context. It explores the latest findings and state-of-the-art developments in technology, covering human and user aspects. The main topics discussed this year focused on embedded applications, context-aware platforms,...

### Reviews

*Comprehensive guide for pdf lovers. It generally is not going to charge too much. You may like just how the article writer write this book.*
