Brand New Book ***** Print on Demand *****.Excerpt from The Natural History of Vegetables, as Well Foreign as Indigenous, Vol. 6: Including an Account of Their Roots, Barks, Woods, Leaves, Flowers, Fruits, Seeds, Resins, Gums, and Concreted Juices, as Also Their Properties, Virtues, and Uses in Medicine, Together With the Method of Cultivating Those Planted in Gardens If we consider the different methods in which the knowledge of Botany has been treated of late, we shall find that none of the sciences so much require abridgment. The science of Vegetables may properly enough be divided into three parts, namely that of their arrangement in the Botanical Nomenclature, their culture and their properties. The last is the only one of real importance, the two former being subservient to it, and of no other benefit but as tending to make the latter more serviceable or more readily comprehended. When the knowledge of Vegetables is once reduced into a science, it is requisite that their names and distribution should be the first thing delivered; but those who first attempted to learn the science from Nature herself, knew...
