

Paroxysmal Nocturnal Hemoglobinuria and Related Disorders: Molecular Aspects of Pathogenesis

By -

Springer. Paperback. Condition: New. 285 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. Few publications focus on the mysterious, genetically acquired disease paroxysmal nocturnal hemoglobinuria (PNH) and the related intractable disorders aplastic anemia and myelodysplastic syndromes. Now, however, the latest understanding of the clinical and molecular genetic aspects of PNH is summarized here in the proceedings of the International Symposium held in Tokyo in 2001. Major topics reviewed include the molecular mechanisms of the PIG-A gene mutation; complement activation and inhibitors; experimental animal models; pathogenesis; the history of PNH research; the natural history of the disease; the mechanism of PNH clone expansion; the emergence of PNH clones under bone marrow failure syndromes; and treatment of the disease by immunosuppressive agents and stem cell transplantation. This book provides an invaluable summary of current research on the fundamental aspects of PNH pathology, presented by renowned experts in the field. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

Undoubtedly, this is the best job by any article writer. This really is for all those who state that there was not a worth reading. I am very easily can get a enjoyment of reading a published pdf.

-- **Rowena Leannon**

A brand new e book with a brand new standpoint. I have read through and that i am certain that i am going to gonna go through again once more in the future. Its been developed in an remarkably simple way in fact it is merely right after i finished reading through this book in which basically modified me, modify the way in my opinion.
