Images of a Changing Earth: Natural and Human Processes: Volume I: Black and White (Paperback)

By Danny M Vaughn Ph D

Createspace Independent Publishing Platform, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book illustrates selected images that exemplify energy exchanges and processes that affect changes on the planet's surface and near surface. Brief explanations are given where appropriate, however, detailed discussions addressing the science involved in explaining geomorphic processes is beyond the scope of this book. Several references addressing the science of geomorphology, remote sensing, geographic information systems, and meteorology are listed in the References section at the end of the book. This is the first volume under the general heading, Images of the Earth. Earth features are shown in grey tones in this volume to illuminate brightness, tone, and contrast without enabling color to dominate the appearance of natural features. There is simplicity in panchromatic (gray tone) photography that speaks to an intense focus isolated on the thematic content within an image. By isolating the tones to grey levels, texture, geometry, static, and dynamic movement become the principal subject. Volume 2 will illuminate the dynamic nature of Earth surface features by bringing color back into images.

Reviews

This pdf is great. It is actually really exciting through reading time. Your daily life span is going to be transform when you comprehensive reading this pdf.
-- **Francis Lubowitz**

Complete guide! Its such a great study. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.
