Experts have yet to reach consensus about what a learning disability is, how to determine if a child has one, and what to do about it. Leading researcher and clinician Deborah Waber offers an alternative to the prevailing view of learning disability as a problem contained within the child. Instead, she shows how learning difficulties are best understood as a function of the developmental interaction between the child and the world. Integrating findings from education, developmental psychology, and cognitive neuroscience, she offers a novel approach with direct practical implications. Detailed real-world case studies illustrate how this approach can promote positive outcomes for children who struggle in school. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
