Forgotten Books, United States, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Catalogue of Books, Manuscripts, Specimens of Clocks, Watches and Watchwork, Paintings, Prints, C. In the Library and Museum of the Worshipful Company of Clockmakers: Deposited in the Free Library of the Corporation of the City of London There are, probably, few subjects connected with Science upon which so little has been published in this country (except occasionally in periodical publications) as those relating to the Theory and Practice of the Art of Clock and Watch Making. The paucity of works upon this subject is the more surprising, when its importance, as connected with the maritime greatness and commercial prosperity of the British Dominions, is duly considered. The safety of its Navy (the source of all its greatness), and also the security of its Commercial Marine, which is the nursery to the former, entirely depend, according to the modern practice of navigation, upon the accurate measurement of time at sea. The productions of our neighbours the French relating to the Science of Horology are much more numerous, and several of them are extremely curious and interesting.
