Condition: New. Publisher/Verlag: Springer, Berlin | First International Workshop, OAMAS 2008, Estoril, Portugal, May 13, 2008. Revised and Invited Papers | Adaptation, for purposes of self-healing, self-protection, self-management, or self-regulation, is currently considered to be one of the most challenging properties of distributed systems that operate in dynamic, unpredictable, and potentially hostile environments. Engineering for adaptation is particularly complicated when the distributed system itself is composed of autonomous entities that, on one hand, may act collaboratively and with benevolence, and, on the other, may behave selfishly while pursuing their own interests. Still, these entities have to coordinate themselves in order to adapt appropriately to the prevailing environmental conditions, and furthermore, to deliberate upon their own and the system's configuration, and to be transparent to their users yet consistent with any human requirements. The question, therefore, of "how to organize the envisaged adaptation for such autonomous entities in a systematic way" becomes of paramount importance. The first international workshop on "Organized Adaptation in Multi-Agent Systems" (OAMAS) was a one-day event held as part of the workshop program arranged by the international conference on Autonomous Agents and Multi-Agent Systems (AAMAS). It was hosted in Estoril during May, 2008, and was attended by more than 30 researchers. OAMAS was the steady convergence of a number of lines of research which suggested that such a workshop would be timely and opportune. This includes the areas of autonomic computing, swarm intelligence, agent societies, self-organizing complex systems, and 'emergence' in general. | Issues in Designing Logical Models for Norm Change.- Adapting Autonomic Electronic Institutions to Heterogeneous Agent Societies.- Adaptation of Voting Rules in Agent Societies.- Decentralised Structural Adaptation in Agent Organisations.- Modeling Feedback within MAS: A Systemic Approach to Organizational Dynamics.- Coordination in Adaptive Organisations: Extending Shared Plans with Knowledge Cultivation.- An Incremental Adaptive Organization for a Satellite Constellation.- Modelling Actor Evolution in Agent-Based Simulations. | Format: Paperback | Language/Sprache: english | 145...
