Date :2011-08-01 Version 4 by Tongji University compiled a gas combustion and Applications (fourth edition) for the college building environment and equipment engineering steering committee planning Recommended materials. The book is 16 chapters. including: gas combustion calculations. gas combustion reaction kinetics. gas combustion air mixing process. the gas flame burning. gas burning method. diffusion-type burners. atmospheric burner. fully premixed combustion devices. special burners. gas interchangeability. civilian gas appliances. gas industrial furnace. industrial furnace waste heat recovery gas. gas industrial furnace thermal calculation. gas industrial furnace aerodynamic calculations. gas application of new technologies. Gas Combustion and Applications (fourth edition) may also be used in gas. natural gas. liquefied petroleum gas and biogas energy utilization of the design. operation and management personnel research and reference. Contents: Chapter gas combustion gas heat value calculation section Section III combustion air required for complete combustion of the fourth quarter run-time calculation of the CO content in flue gas and gas-fired combustion excess air coefficient V temperature and enthalpy of combustion gas temperature map Chapter chemical reaction kinetics Section III II chain reaction gas fire gas ignition Chapter IV gas mixing combustion air flow in the stationary section Section III free jet flow parallel to the intersection V turbulent swirling jet flow IV Chapter gas diffusion flame burning flame propagation section II the theoretical basis of method to the determination of the first flame propagation speed three factors that affect the flame propagation speed flame propagation speed of the fourth quarter of the gas mixture calculated turbulent flame propagation V Section VI Chapter concentration limit flame burning gas diffusion method of Section II part of the premixed combustion...
