Springer-Verlag KG Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 249x172x20 mm. Neuware - This volume is one in a series of monographs being issued under the general title of 'Disorders of Human Communication'. Each monograph deals in detail with a particular aspect of vocal communication and its disorders, and is written by internationally distinguished experts. Therefore, the series will provide an authoritative source of up-to-date scientific and clinical information relating to the whole field of normal and abnormal speech communication, and as such will succeed the earlier monumental work 'Handbuch der Stimm und Sprachheilkunde' by R. Luchsinger and G. E. Arnold (last issued in 1970). This series will prove invaluable for clinicians, teachers and research workers in phoniatrics and logopaedics, phonetics and linguistics, speech pathology, otolaryngology, neurology and neurosurgery, psychology and psychiatry, paediatrics and audiology. Several of the monographs will also be useful to voice and singing teachers, and to their pupils. G. E. Arnold, Jackson, Miss. F. Winckel, Berlin B. D. Wyke, London Preface This book tries to illustrate the practice as well as the principles involved in applying linguistics to the analysis of language disability. In writing it, I have assumed an audience of professional speech and hearing clinicians who have had little or no formal training in linguistics. Each Chapter therefore begins with a resume of the main theoretical and descriptive principles needed in order to carry out a clinical linguistic analysis. The relevance of language acquisition studies is a major theme within this resume. 229 pp. Englisch.
