

Medicare: More Beneficiaries Use Hospice Many Factors Contribute to Shorter Periods of Use: T-Hehs-00-201

By -

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO discussed issues related to the use of Medicare's hospice benefit, focusing on: (1) the patterns and trends in hospice use by Medicare beneficiaries; (2) factors that affect the use of the hospice benefit; and (3) the availability of hospice providers. GAO noted that: (1) the number of Medicare beneficiaries choosing hospice services has grown substantially during the past decade--nearly 360,000 beneficiaries enrolled in 1998, more than twice the number that elected hospice in 1992; (2) cancer patients account for more than half of Medicare hospice users, but the most dramatic growth in use is among persons with other terminal conditions, such as heart disease, lung disease, stroke, or Alzheimers disease; (3) although more beneficiaries are choosing hospice, many are doing so closer to the time of death; (4) half of Medicare hospice users are enrolled for 19 or fewer days, and service periods of 1 week or less are common; (5) many factors influence decisions about whether and when to begin hospice services, including physician practices, patient preferences and circumstances, and general awareness of...
