The Path Less Traveled: A Comparison of Tired Light and the Expanding Universe: How the Universe Looks Without the Big Bang

By Jerrold Thacker

Dog Ear Publishing, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Since man first began looking at the stars, he s wondered about their origins and his own. Modern astronomers have explained the beginnings of the universe with the Big Bang Theory, in which all matter erupted from a single explosion billions of years ago. As the universe s mysteries have deepened, astronomers have introduced an increasing number of concepts which defy understanding, such as an expanding and accelerating universe, galaxies at incredible distances, massive and unexplainable black holes, quasars and bazars with unbelievable distances and energy, dark matter and dark energy which supposedly comprise 96 of the universe but can t be found, pulsars which defy logic, and many other phenomenon which stretch our imagination. Amateur astronomer Jerrold Thacker calls the Big Bang Theory and its accompanying scientific theories preposterous. Instead, he proposes an alternate explanation for what we observe, based not on the prevailing Doppler Effect and the concept that the universe s galaxies are receding from our own with increasing velocity but on the Tired Light Effect, based on Einstein s General Theory of...
