Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Orchardring, Vol. 2: Revised From the Fifth Edition of the Bulletin on Apple Growing Increasing interest in apple growing in Massachusetts and the many requests for information applying to Massachusetts conditions have made necessary a new edition of the bulletin on Apple Growing. Since the new book includes a chapter on peach growing, and it is planned to have a chapter on pear culture in the next edition, the title has been changed to Orchardring. In preparing this book the text of the last (fifth) edition of Apple Growing has been carefully revised and brought up to date. The three articles, Varieties of Apples for Massachusetts Orchards, The Planting of a Commercial Orchard in Massachusetts and The New Orchard, all by Professor F. C. Sears, have been combined into one new article, which appears as Chapter I. The material presented in the article entitled Three Common Scale Insects and Plant Lice or Aphids, both by H. T. Fernald, have been included in the chapter on Apple Insects, and the Spray Calendar for Apples by Erwin H. Forbush has been revised and included in the chapter on Insecticides and Fungicides. Orchardring is undoubtedly one of the most important branches of Massachusetts farming. Apple growing particularly is a well-established part of our agriculture, because Massachusetts produces good fruit and has the advantage of being at the door of large markets, which will take all she produces as soon as it is properly graded and packed. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology...
