Purification Of Alcohol Dehydrogenase From Yeast Cells

By Pradeep Kumar

LAP Lambert Academic Publishing Aug 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x4 mm. Neuware - Proteins and enzymes have a vast scope of applications in several aspects of our life like in detergents, leather, paper and pulp, textile, cosmetic, healthcare and food processing industries, for clinical and diagnostics research. Due to the wide uses of proteins and enzymes interest in the industrial production of such useful enzymes has grown up in recent years. Today the focus is on developing efficient purification methods for proteins which can meet the increasing industrial needs. A number of separation and purification strategies have been developed for these purposes including non chromatographic methods and also some modern methods including chromatographic techniques. This work aims to develop such an efficient method for the purification of biochemically important enzyme, Alcohol Dehydrogenase from yeast cells. Three phase partitioning is a useful affinity based non chromatographic method to purify proteins and enzyme which is applied to purify the enzyme ADH. This book will be proved useful for researchers, students, individuals and anyone working in the area of protein purification. 72 pp. Englisch.

Reviews

This ebook is really gripping and interesting. It is among the most remarkable pdf we have study. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Cleve Bogan**

A superior quality book along with the font employed was exciting to see. It is one of the most amazing book i have got read through. You wont really feel monotony at anytime of the time (that's what catalogs are for about in the event you ask me).
