Nonlinear heating of a magnetoplasma In the following parts of this section, we give the results of the theoretical study of the heating of a magnetoplasma under the action of the electric field Eoe it in the microscopic (hydrodynamic) approximation. They are used for some numerical calculations, mainly of the temperature dependencies of the electrons at different altitudes Z of the ionosphere and different angular frequencies ω , in particular, in connection with the orbit (Z 300 km) of the TSS-1 mission (Section IV. I). However, by the general statement of this problem, the microscopic theory has difficulties from the very...
