Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from A New Method of Determining the General Perturbations of the Minor Planets *Sto rangen der kleinen Planeten*, undoubtedly marks a great advance in the determination of the general perturbations of the heavenly bodies. The value of the work is greatly enhanced by an application of the method to a numerical example in which are given the perturbations of Egeria produced by the action of Jupiter, Mars, and Saturn. And yet, notwithstanding the many exceptional features of the work commending it to attention, astronomers seem to have been deterred by the refined analysis and laborious computations from anything like a general use of the method; and they still adhere to the method of special perturbations developed by Lagrange. Hansen himself seems to have felt the force of the objections to his method, since in a posthumous memoir published in 1875, entitled *Ueber die Sto rangen der grossen Planeten, insbesondere des Jupiters*, his former positive views relative to the convergence of series, and the proper angles to be used in the arguments, are greatly modified. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
