## BUILDING BRIDGES IN ABSTRACTION-BASED CONTROLLER SYNTHESIS

Epubli. Taschenbuch. Condition: Neu. Neuware - Abstraction based controller synthesis is a well established two-step procedure to solve complex control problems involving discrete valued quantities. First, a symbolic abstraction of the system to be controlled is generated providing a discrete time model with a finite, discrete valued signal space and finitely many states. Second, a symbolic controller for a desired symbolic specification is constructed using the previously generated symbolic model. This controller synthesis approach is usually used in two different...
