HOW BIG IS GOD'S COMPUTER?: HOW DOES GOD KNOW WHETHER WE GO TO HEAVEN OR HELL?

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Do you believe in God and life after death? If so, then you probably assume that God is the one who will determine whether you deserve an eternal reward or punishment after your life on earth. In order to determine whether we go to heaven or hell, God needs to track our venial and mortal sins. In other words, did the quality of our lives justify an eternal reward? That means that God needs to have a record of all of our thoughts, words and actions along with a record of significant events, relatives and numerous other data items. There are more than 7 billion humans on earth now. How does God know about everything that we think, do and say? How does He know who we are? How does He give us a grade card on the quality of life that we lived? How does God quickly, efficiently and accurately perform this data tracking and disposition process for billions of human beings? The answers to these questions suggest that God must have a fantastic memory whether it is His/Her personal memory or a computer. Maybe He has some other type of memory device that we are not familiar with. a memory that can process and store information faster and in larger quantities than any man-made super-computer. This Book explores a Data Base that could be used by God to track us and monitor our behavior. How does God classify our sins? Where is the record of our DNA? Does He use a database? If so, what type? How many bytes of computer storage space would the database of each human being require? This book is not an expose...
