Createspace, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Facebook is a modern phenomenon; a virtual meeting place with 500,000,000 active users (rising daily) and a marketer's paradise when you know how to build a list of precisely targeted prospects and milk it legitimately. There are no shortcuts to this system and no escape routes to parachute you ahead of everyone else using it in the race to build a catalog of 5000 friends on Facebook. You must follow every step in sequence in the Facebook List Builder for beginners. Failure to do will result in frustration, disillusionment, and a long slow trek to your target of 5000 friends (or beyond if Facebook permits). But the good news is that this system is simplicity personified. Once you have the basic structure up and running the daily tasks you will (and must) perform won't take up much of your time, and if you find yourself flagging for whatever reason, the sight of your list growing and growing like Topsy will soon galvanize you back into action.
