## Sou Fujimoto: Serpentine Gallery Pavilion 2013 (Paperback)

By Niklas Maak

Verlag Der Buchhandlung Walther Konig, Germany, 2013. Paperback. Condition: New. Language: English . Brand New Book. The Serpentine Gallery Pavilion 2013 is designed by award-winning Japanese architect Sou Fujimoto (born 1971)--the thirteenth and, at 41, youngest architect to accept the invitation to design a temporary structure for the Serpentine Gallery. The Serpentine's past pavilions have included designs by Herzog de Meuron and Ai Weiwei (2012), Frank Gehry (2008), the late Oscar Niemeyer (2003) and Zaha Hadid (2000). Inspired by organic structures such as forests, nests and caves, Fujimoto's buildings inhabit a space between nature and artificiality. Fujimoto's pavilion is a delicate, latticed structure of steel poles--lightweight and semi-transparent in appearance--that allows it to blend, cloudlike, into the landscape and against the classical backdrop of the Gallery's colonnaded East wing. It is designed as a flexible, multipurpose social space. This volume documents the project.

### Reviews

*It is one of my personal favorite books. It is written in easy terms and never hard to understand. It has been designed in an exceedingly easy way and it is only after I finished reading this publication by which in fact changed me, change the way I think.*

-- **Lucinda Stiedemann**

*I actually started reading this article publication. We have read and that I am confident that I am going to plan to study yet again later on. You can expect to like how the author composed this pdf.*

-- **Zoe Hilpert**
