

IUTAM Symposium on Developments in Geophysical Turbulence

Filesize: 7.64 MB

Reviews

This pdf can be worth a read through, and a lot better than other. I really could comprehend everything using this written e book. I am just pleased to explain how this is actually the very best book i have read through in my individual lifestyle and can be he very best publication for actually.

(Jaclyn Price)

IUTAM SYMPOSIUM ON DEVELOPMENTS IN GEOPHYSICAL TURBULENCE

To get **IUTAM Symposium on Developments in Geophysical Turbulence** PDF, you should access the button listed below and save the ebook or get access to other information which might be in conjunction with IUTAM SYMPOSIUM ON DEVELOPMENTS IN GEOPHYSICAL TURBULENCE book.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Held at the National Center for Atmospheric Research, Boulder, CO, June 16-19, 1998 | This symposium continues a long tradition for IUGG/IUTAM symposia going back to "Fundamental Problems in Turbulence and their Relation to Geophysics" Marseille, 1961. The five topics that were emphasized were: turbulence modeling, statistics of small scales and coherent structures, convective turbulence, stratified turbulence, and historical developments. The objective was to consider the ubiquitous nature of turbulence in a variety of geophysical problems and related flows. Some history of the contributions of NCAR and its alumni were discussed, including those of Jackson R Herring, who has been a central figure at NCAR since 1972. To the original topics we added rotation, which appeared in many places. This includes rotating stratified turbulence, rotating convective turbulence, horizontal rotation that appears in flows over terrain and the role of small scale vorticity in many flows. These complicated flows have recently begun to be simulated by several groups from around the world and this meeting provided them with an excellent forum for exchanging results, plus interactions with those doing more fundamental work on rotating stratified and convective flows. New work on double diffusive convection was given in two presentations. The history of Large Eddy Simulations was presented and several new approaches to this field were given. This meeting also spawned some interesting interactions between observational side and how to interpret the observations with modeling and simulations around the theme of particle dispersion in these flows. | Preface. 1. A brief history of the Geophysical Turbulence Program at NCAR; J.R. Herring. 2. The meteorological development of large eddy simulation; D.K. Lilly. 3. Developments in high-Rayleigh number convection; R.W. Griffiths. 4. Direct numerical simulations of particle motion in relation to structure in...
