Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Syllabus of a Course of Lectures on Physiology In the new edition of the Syllabus of my Lectures on Physiology, I have followed the same arrangement as in the last, with the exception that in the chemical part the descriptions of immediate principles, which were before printed separately, have now been incorporated in the text. The whole has been revised, and some parts have been much extended. Under the title Practical Exercises, I have added to the Syllabus instructions for laboratory work relating to the chemical properties of the animal liquids, and of the most important foodstuffs; and to the physiological endowments of living tissues and organs. The experiments I have selected are of so simple a character that, with the directions given and such aid as he will readily obtain in the laboratory, every man who takes pains will find it easy to carry them out successfully. The chemical series already form part of the Course of Practical Physiology. The others, which relate chiefly to the properties of the excitable and contractile tissues, have been hitherto omitted; not because they are regarded as of less importance, but for want of space - a difficulty which will be removed as soon as our new laboratories are completed. I cannot too strongly recommend their Use to all who desire to acquire a serviceable knowledge of the elementary facts of physiology. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In...
