THE INTUITIVE WAY OF KNOWING: A TRIBUTE TO BRIAN GOODWIN (PAPERBACK)

FLORIS BOOKS, United Kingdom, 2013. Paperback. Condition: New. Language: English . Brand New Book. Professor Brian Goodwin (1931-2009) was a visionary biologist, mathematician and philosopher. Understanding organisms as dynamics wholes, he worked to develop an alternate view to extreme Darwinism based solely on genetic factors. He was a pioneer in the field of theoretical biology; in later years was made a founding fellow at Schumacher College near Totnes, England, where he taught holistic science and wrote his final book, *Nature's Due: Healing our Fragmented Culture*. This new book is a tribute to the life and work of Brian Goodwin. It includes contributions from eminent scholars and academics around the world, addressing his work on pattern and form in biology, and the metaphysical principles that guided him. It also includes an interview with Goodwin which offers new insights into his thinking. The book honours both his work and personal memories of a much loved and respected colleague. Contributors include: Stuart Kauffman, Lewis Wolpert, Fritjof Capra, Margaret Boden, Michael Ruse, Fred Cummings, Mae-wan Ho, Philip Franses, Stephan Harding, Nick Monk, Claudio Stern and Johannes Jaeger.
