Pail Cover. --Having the pail cover E, Figure 84, cut from metal, we are now ready for the raising process. First, hammer a circular depression 314 inches in diameter and inch deep in the top of a lead block. Next, place the flat disc of metal over the depression in the block, in the position shown at 1, Figure 85, and with the raising hammer strike blows all around the edge of the circle, hammering out any wrinkles that may form during the operation. This will raise the metal to the shape shown at 2. Then, with the cover in the position shown in 3, strike another course of blows around inside of the first course. Continue this process until the cover is brought to the shape shown at 4. The center is then raised by striking light blows with the hammer while holding the cover...
