ON ZOOM-DEPENDENT CALIBRATION OF COSUMER-GRADE CAMERAS

Condition: New. Publisher/Verlag: AV Akademikerverlag | Concepts and experiments | The objective of geometric camera calibration is to determine a parametric model of the projective features of an imaging device. These features describe the mapping of the image coordinates to the viewing rays in space and are of importance for various applications in computer vision like synthetic views, spatial reconstruction and tracking. Numerous work exist on solving the problem for fixed focus lenses. In this book especially the problem of...
