

Vibrational Pseudospin Solutions of Doped Triglycine Sulphate Crystal

By Nautiyal, Ashish / Upadhyay, Trilok Chandra

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Ferroelectric, Thermolectric, Photoelectric, Mechanical Properties of High Polarity Doped Triglycine Sulphate Crystal | Ferroelectricity is one of the famous class of condensed matter physics in which, at present time a number of research works and projects are going on with better efficiency. This sixty years research of ferroelectrics resulted, a best developing alternate of semiconductor world. For example, infrared technology is a very famous and progressive technology in our surrounding life for different purposes, specially for night vision purpose which is mostly utilized in wild life video recordings and geological study purposes. Societies are taking many advantages of this modern technological applications. In this work we are trying to explain the different characteristics of pure and high polarity doped ferroelectric triglycine sulphate crystal at different external electric fields in terms of internal lattice mechanism. Here we have also tried to explain the possible applications of pure and doped triglycine sulphate crystal in different technologies like pyroelectric detection technology, infrared detection technology, computing technology etc. We are trying to find out the characteristics of liquid ferroelectric crystals in different external electric fields and pressure conditions. | Format: Paperback | Language/Sprache: english | 120...

Reviews

It in a of my personal favorite book. It really is filled with wisdom and knowledge Your daily life period will likely be enhance the instant you total looking at this pdf.

-- **Mr. Rocio Schroeder Sr.**

This publication will never be effortless to get started on reading through but very entertaining to read through. It normally is not going to expense too much. I discovered this publication from my dad and i encouraged this book to find out.
