## GOD IS A UNIVERSE OF INTELLIGENT ENERGY (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.For thousands of years the concept has existed that the true nature of the universal creative forces, we call God, is intelligent energy, or pure consciousness. Unfortunately the idea of pure consciousness is very hard to grasp and despite the efforts of mystics to explain it for thousands of years, it has remained on the edges of traditional religious thinking. Although kept alive in eastern religions and mysticism it has been largely ignored by western religions and science, except for one small flicker when Rene Descartes declared I think, therefore I am. Only in the last few years has it been possible to clarify the concept somewhat, and for this book to be written. Ironically it is western science that is providing the opportunity. After being forced to junk its insistence on the universe being composed of matter operating in machine-like precision, western science has been forced to accept a universe of energy operating according to as yet unknown causes. Science is now establishing that the organizations of energy that constitute our world have infinite possibilities. This raises the question of why anything is what it is and what is the cause. As science struggles to answer this question the author dares to preempt it. His answer, of course, is intelligent design implemented by a God of intelligent conscious energy. The net result is that modern science is beginning to verify this ages old concept and the foundation for tomorrow s science based religion is being constructed. With the exponential speed modern technology is developing it may come very soon.
