

Wills Eye Institute - Oculoplastics (2nd Revised edition)

By Robert B. Penne

Lippincott Williams and Wilkins. Paperback. Book Condition: new. BRAND NEW, Wills Eye Institute - Oculoplastics (2nd Revised edition), Robert B. Penne, This text is part of the "Color Atlas and Synopsis of Clinical Ophthalmology" which was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series, Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveitis, employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions. "Oculoplastics, Second Edition", presents unmistakable guidelines for the differential diagnosis and treatment of the full range of oculoplastic conditions. This book is a unique combination of text, quick reference, and color atlas, with over 250 full color illustrations throughout. A short, succinct format includes: Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.
