

## Inductive Power Transfer System

By P. Marudhamuthu

LAP Lambert Academic Publishing Jun 2013, 2013. Taschenbuch. Condition: Neu. Neuware - The main objective of this project is to design a inductive power transfer system by using ac ac converter. This paper proposes to generate a high-frequency current for inductive power-transfer (IPT) systems. Unlike traditional dc ac converters for IPT systems, the proposed converter can achieve a high-frequency current generation directly from an ac power source without a dc link. The power converter can maintain high-frequency resonance by natural circuit oscillation and discrete energy injection control. Contact less power transfer system employ power converters to generate a high frequency current in a primary coil to magnetically coupled to one or more secondary coil across a large air gap without direct electric contact less power transfer system due to clean environment and eliminates sparking. 64 pp. Englisch.

### Reviews

*This type of publication is almost everything and helped me looking forward and much more. I am quite late in start reading this one, but better then never. You wont really feel monotony at whenever you want of your own time (that's what catalogs are for relating to if you ask me).*

-- **Prof. Buddy Leuschke**

*The publication is great and fantastic. I actually have read through and i am sure that i am going to planning to go through yet again yet again down the road. I realized this pdf from my dad and i encouraged this publication to understand.*

-- **Jamarcus Runolfsson**
