

Structural Elements of the Nervous System

Filesize: 3.12 MB

Reviews

A fresh e-book with a brand new standpoint. Sure, it is play, nevertheless an interesting and amazing literature. Its been printed in an extremely straightforward way and it is just soon after i finished reading this pdf where in fact modified me, change the way in my opinion.

(Deondre Hackett)

STRUCTURAL ELEMENTS OF THE NERVOUS SYSTEM

Book Condition: New. Publisher/Verlag: Springer, Berlin | Neurochemistry, having the objective of elucidating biochemical processes subserving nervous activity, emerged as an application of chemistry to the of neurobiological problems as a post-World War II phenomenon. investigation However, only in the last 40 years has the chemical community recognized neurochemistry as a distinct, if hybrid, discipline. During this period great strides have been made. However, recently neurochemistry, along with neu rophysiology, neuropharmacology, neuroanatomy, and the behavioral sci ences, has emerged to form neuroscience, a new community of scientists with its own national society, journals, and meetings. Actually, this recently formed hybrid, neuroscience, is in the process of merging with another well-established discipline, molecular genetics (frequently called molecular biology, and itself a hybrid), which appears to have sufficient hybrid vigor to form yet a new community of scientists, which, for want of a more imaginative term, has been called molecular genetic neuroscience. Clearly, advantages resulting from such mergers or hybridizations accrue not only from the merging discipline (neurochemistry in this case) to the new community (molecular genetic neuroscience), but also in the reverse direction. This Foreword will be concerned primarily with examples of this latter process. | 1 The Synaptosome.- 2 The Synaptic Vesicle.- 3 Noradrenergic Vesicles: Molecular Organization and Function.- 4 Synaptic Proteins.- 5 Brain Mitochondria.- 6 The Smooth Endoplasmic Reticulum.- 7 Lysosomes.- 8 Brain Nuclei.- 9 Membrane Markers of the Nervous System.- 10 Microtubules in the Nervous System.- 11 Neuronal Intermediate Filaments.- 12 Local Synthesis of Axonal Protein.- 13 The Axonal Plasma Membrane.- 14 Central Nervous System Myelin.- 15 Autonomic Ganglia and Their Biochemistry.- 16 Brain Capillaries: Structure and Function.- 17 The Blood-Brain Barrier.- 18 Attenuated Blood-Brain Barrier.- 19 Immunohistochemistry of Cell Markers in the Central Nervous System.- 20 Neurochemistry of Invertebrates. | Format: Paperback | Language/Sprache: english | 1377...
