Reviews

It is in a single of my favorite pdf. Yes, it is engage in, still an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The High School Course in Mathematics The purpose of this bulletin is twofold: First, to outline the course in high school mathematics as well as to indicate methods of presentation for the various topics; second, to point out some of the subjects which lie just beyond the scope of the high school work and which form a necessary background for it. It is assumed that the best presentation of such topics as the fundamental laws of algebra, irrational numbers, the axioms and postulates of geometry, and limits, is impossible Without a much fuller knowledge of these subjects on the part of the teacher than can be gotten from the ordinary elementary text-book.
