Reviews

It is one of the most popular books. I am quite late in starting to read this one, but better than never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Brand New Book ***** Print on Demand *****.Excerpt from Bedside and Wheel-Chair Occupations, Vol. 5 The following chapters contain the substance of some lectures which were given to the classes at the Boston School of Occupational Therapy. I have tried to make clear some of the limitations and the possibilities of bedside occupations. What is the use of teaching handicapped soldiers or civilian convalescents a lot of trivial crafts such as basket-making and block printing when they need so much to be on their way toward self-support. Is it not a waste of time? The answer is yes, most assuredly , unless the bedside occupations are used largely as a means to an end; unless they are abandoned as soon as the patient is able to do something more valuable and purposeful. Used for a short time in early convalescence, the small crafts are of the utmost importance - they are first of all diversional, then constructive. Many a convalescent fails to make any progress at all without some easy occupation which docs not tax his newly-found strength; some occupation which interests him, which builds up his resistance and his ability to sustain effort. It is becoming more and more evident that bedside occupations, coming with their stimulus and encouragement at the turning point between helplessness and convalescence, represent a very important element of treatment - a small but indispensable factor in the program of rehabilitation.
